Projects

GeekZ, *React.js, FLASK SQLALCHEMY, PYTHON, REST* [🔗](#)

- Full stack React Web application where fan and adept can follow their favorite characters, series, and comics.
- You have your own account, you can log in to see all the posters available.
- You can add poster to your favorite list or the cart for later purchase.

Spotless, *React.js, Flask, Python, RestApi* [🔗](#)

- Full stack React web application that allows homeowners and Airbnb host to find gig worker to clean their property
- As a host you can add your properties, delete, you can create a listing, you can cancel it.
- A gig worker can log in, accept a listing the same way an Uber driver accepts a trip, it goes to his schedule, he can cancel it or mark the job as complete.
- Host can see his completed listing and live a review to the worker.

My Personal Website [🔗](#)

- Used Vercel to store my project informations
- Implemented animations and built front-end using TypeScript and css

Education

Software Engineering Career Course

4Geeks Academy

04/2024 | Boca Raton, FL

Bachelor's of Science - Computer science

Higher school of Infotronics of Haiti

07/2022 | Port-au-prince, Haiti

Professional Experience

IT technician, *PHI(Priority Health International)*

09/2022 – 08/2023

- Provide technical support for desktops, laptops, printers, and mobile devices
- Diagnosed and resolved hardware issues including desktops, laptops, printers, and peripherals. Conducted regular maintenance to ensure optimal performance and longevity of IT equipment.
- Responded to IT support tickets and inquiries in a timely manner, resolving technical issues remotely or through onsite visits.
- Later on, I worked as a freelancer on their database, helping to rewrite some queries and update their model. I utilized the correct data types and created procedures for optimization.
